SUMMARY

Motivated Data Science undergraduate with **1 year of experience** building **Agentic AI** and **Agentic RAG** systems, with strong skills in **Python, data analysis, and machine learning**. Experienced through projects and internships in delivering scalable AI solutions combining **retrieval, reasoning, and automation**, and known for collaborative problem-solving and continuous learning.

TECHNICAL SKILLS

Python (Pandas, NumPy), SQL, FastAPI, Flask, Django, LangChain, WebSockets, Streaming, RAG, Embeddings, Vector Databases (Qdrant), NLP, Transformers, Web Scraping, Git, Docker, PostgreSQL, MySQL, HTML, CSS, JavaScript, Java

EXPERIENCE

Associate data scientist | NexusXperts | Fulltime | 06/2025 - Present

- Built and deployed a web application using FastAPI, RAG pipelines, OpenAI embeddings, and web scraping for intelligent information retrieval live at **https://agent.geniusai.biz/**
- Built a real-time voice & SMS agent for callback booking and FAQ handling using FastAPI/Flask with WebSockets, media streaming, and caching live at **https://app.stellaeai.com/**.

PROJECTS

Hiro (FYP) | Python, Django, LangChain, OpenAI API, HuggingFace, QDrant, Docker

- Developed an AI-powered Resume Intelligence System to analyze, score, and rank resumes using NLP and machine learning
- Implemented semantic matching between resumes and job descriptions using embeddings and pretrained language models.

Personal AI Journalist

- Developed an LLM-based pipeline for news scraping, summarization, and text-to-speech audio generation.

Medical Chatbot

- Built a RAG-based document Q&A system using LangChain and embedding-based retrieval.

EDUCATION

Punjab University College of Information Technology (PUCIT), Lahore, PK Bachelor of Science in Data Science Sep. 2022 – Present

Government Islamia College, Civil Lines Lahore, PK

Fsc (Pre Medical) Sep. 2019 – 2021

Scanned with CamScanner
